Students Achievements
Department of Computer Science and Engineering
BIT Jaipur

Academic Achievements

Many of our students have pursued higher education in reputed Foreign and National Universities.

Higher Studies from Reputed Foreign Universities

- MS from University of Southern California.
- MS from San Diego State University.
- MS from Florida University.
- Master in Science in Business Analytics from University of Singapore.
- MBA from Ohio State University.
- MS from University of Texas, Dallas.
- MS from Cornell University.
- MS from Stony Brook University, New York.
- MS from New York University.
- MS from University of Sydney.
- MS from University of Minnesota, Twin Cities.
- MS from Stony Brook University, New York.
- Masters in Business Analytics, Oklahoma State University.
- MS from University of Seattle.
- MS from University of Pittsburgh.
- MS from University of Illinois at Urbana Champaign.
- MS from University of Florida Orlando.
- Masters from University of Minnesota.
- MS from Columbia University, New York.

Higher Studies from Institutions of National Repute

- M.Tech from IIT, Delhi.
- M.Tech from IIIT, Delhi.
- M.Tech from MNIT, Jaipur.
- M.Tech from IIT, Calicut.

- MBA from IIM Lucknow.
- MBA from IIM Shillong.
- MBA from IIM Indore.
- MBA from IIM Kozhikode.
- MBA from XLRI.
- MBA from IIT Madras.
- MBA from IIT Kanpur.
- MBA from Indian School of Business.
- MBA from S.P. Jain Institute.

Other Achievements

We are proud to share that a team of our students from BIT Mesra, Jaipur Campus—Sahil Arora, Rashmi Kumari, and Yuvang Khadolia (CSE), along with Armaan Hussain (AI)—secured First Position at the Global Summit AI Hackathon, held during Digifest Rajasthan 2026 on 5–6 January 2026 in Jaipur.

The state-level hackathon was organised by the Government of Rajasthan (GoR) in association with TiE Global and witnessed participation from hundreds of teams across Rajasthan, making the competition extremely intense and prestigious.

The winning team was awarded a cash prize of ₹1,50,000 (One Lakh Fifty Thousand Rupees) for developing an AI-enabled, geo-verified mobile solution designed for real-time field surveys and intelligent anomaly detection—a solution with strong potential for use in governance, infrastructure monitoring, and public service delivery.

Congratulations to the entire team on this outstanding success!
