ECE Laboratories
Department of Electronics and Communication Engineering
BIT Jaipur

Electronics Lab 1
Electronics Lab 1 embarks Advance Communication Lab, Wireless & Networking Lab, Microwave Engineering Lab and is equipped with advance standard equipment like Network Analyzer, Vector Network Analyzer, satellite trainer kit, Microwave bench, CDMA trainer kit, VOIP related trainer kits and facilitates industry standard based experiments.

Electronics Lab 2
No description provided.

Electronics Lab 3
Electronics Lab 3 embarks Communication System Lab, Electronics Measurement Lab, Fiber Optics Lab, Digital Design Lab and is equipped with all advance equipment like Time Division Multiplexer Kit, LVDT trainer kit, Strain Gauge Measurement trainer kit and all modern Fiber Optics trainer kit for industry standard based experiments.

Electronics Lab 4
Electronics lab 4 embarks application based Microprocessor and Microcontroller trainer kits, and interfacing trainer kits to elucidate and augment practical skill set to meet industry demands. It also embeds industry standard Intelligent Instrumentation based software and Hardware like NIs LabVIEW, ELVIS II+ boards, My RIO and My DAQ cards along with PLCs like ABB 40 series and 500 series to give insight of the industry and laboratory experiments are designed to meet Industry 4.0 and Industry 5.0 standards integrated with IOT and IOMT.

Electronics Lab 5
The Simulation Lab (Electronics Lab 5) is equipped with advanced tools such as Cadence, MATLAB, Commsim, TCAD, DSK kits, and Xilinx software, providing a comprehensive platform for circuit design, signal processing, communication system simulation, and VLSI design. This well-equipped environment enables students to bridge theoretical knowledge with hands-on experimentation in real-world scenarios.

Laboratory Technicians (L.T.)
1. Mr. UmaShanker Sharma
2. Mr. Deen Dayal Gupta
