BIT Jaipur Placement Process

The placement process at BIT Jaipur operates under the centralized Training and Placement (T&P) division of BIT Jaipur. Students register on the BIT Jaipur Placement Portal, attend pre-placement talks, participate in recruitment drives, and receive offers through a structured, tier-based system.

1. Registration & Profile Building

- **Portal Activation:** Students activate their account on the BIT Placement Portal using their Roll Number and ERP credentials.
- **Resume & Guidelines:** Students must accept the institute's placement policy, fill out their profile details, and upload necessary document proofs for faculty verification.

2. Company Announcement & Registration

- **Job Publication:** Companies share their Job Application Form (JAF), which includes eligibility criteria, job descriptions, pay, and rewards.
- **Application:** Eligible and interested students register for specific company drives through the T&P portal.

3. Recruitment Drives & Selection

- **Process Location:** Students from the Jaipur extension centre sit for Mass Recruiters directly, while some Tier-1 and specific core companies may require students to participate in drives alongside the main Mesra campus students.
- **Testing Formats:** The selection process typically involves online assessments (Aptitude, Coding, Technical), Group Discussions (GDs), and Personal Interviews (PI).

4. Offer Policy & Norms

- **Tier and Dream Offers:** Placed students in IT services or core companies may not be allowed to sit for further drives unless selected for "Dream Recruiters" at the discretion of the T&P division.
- **Offer Limits:** Students are limited to a maximum number of opportunities (up to 10) or until they secure a final "Dream" offer.
